## VULNERABILITY FIND, FIX, REPORT (VFFR)

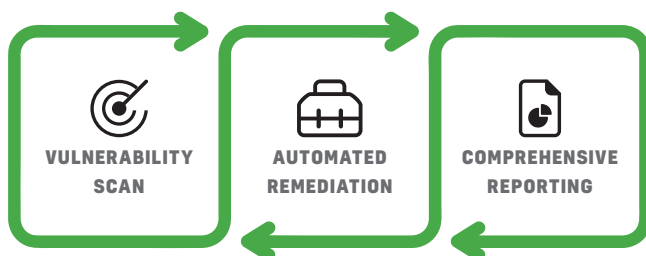

Find, Fix, and Report on Vulnerabilities with Tenable + Bacon Unlimited + TWE Solutions

**60% of breach victims said they were breached due to unpatched known vulnerabilities.** While the typical corporate network contains millions of vulnerabilities, most organizations only patch about 10% of them per month. Teams spend an average of more than 130 hours per week monitoring systems for threats.

Our service leverages the best-in-class tools Tenable and Bacon Unlimited® to provide advanced vulnerability detection and automated remediation, ensuring comprehensive risk management and streamlined reporting for leadership and governing agencies.

### The vFFR Solution

Our vulnerability management service consists of three main steps:

- 1. Vulnerability Scan:** Performs deep and accurate scans of your endpoints, servers, and applications.
- 2. Automated Remediation:** Quickly deploys patches and configurations through profiles for all operating systems.
- 3. Comprehensive Reports:** Shows your vulnerability exposure, patch status, and compliance.

### WITH vFFR, TAKE ADVANTAGE OF THE FOLLOWING SERVICE BENEFITS!

#### ■ Reduce Your Risk:

Reduce your risk of cyberattacks and data breaches by identifying and fixing vulnerabilities before they are exploited by hackers.

#### ■ Improve Compliance:

Improve your compliance with industry standards and regulations by demonstrating that you have a robust and effective vulnerability management program.

#### ■ Save Time & Resources:

Save time and resources by outsourcing your vulnerability management tasks to our experienced and certified team of experts.
